

Spring 2026

Re: Update on Phase Two Consultations for proposed Kilberry Wind Farm

Dear Resident,

We are writing to update you on the progress of the proposed Kilberry Wind Farm. During the consultation sessions held in March 2025, we indicated our intention to publish a draft layout and hold a second series of consultation events in late 2025. We are reaching out to inform that as the series of environmental surveys that we need to complete to determine the draft layout are still ongoing, the second series of consultation events will now take place in Summer or Autumn 2026. We understand the importance of these consultation events and appreciate your understanding as we complete the necessary surveys over the coming months.

In due course, we will bring forward a draft layout (including details on turbines height, location, proximity) to the local community for consultation and feedback. This layout will be distributed to residential properties within 2km of the boundary of the project site. Following the completion of this distribution, we intend to hold a series of consultation events in the local communities. Details of these sessions will be included in the information pack containing the draft layout and will also be advertised via local media and via the dedicated project website www.kilberrywindfarm.ie.

Please be assured that we remain committed to publishing the draft layout once the necessary surveys are concluded. In the meantime, should you have any questions or require further information, please contact the project's community liaison James on 087 708 7022 or via the project email address info@kilberrywindfarm.ie.

Thank you for your continued cooperation.

Yours faithfully,

Kilberry Wind Farm Community Relations Team
